

IN THE CLAIMS

Please amend the claims as follows:

Claim 1 (Canceled)

Claim 2 (Previously Presented): A holder, comprising:

a first component holding unit configured to hold an image pickup device on a main surface of a board; and

a second component holding unit configured to hold another component on said main surface at a location different from a location of said image pickup holding unit, wherein said first and second component units are formed as a single piece, and said first component holding unit is configured to hold a substantial portion of a surface of said image pickup device in direct contact to said main surface.

Claim 3 (Previously Presented): The holder according to claim 2, wherein said first component holding unit is in a frame shape configured to surround and hold a periphery of said image pickup device.

Claim 4 (Original): The holder according to claim 3, wherein said first component holding unit is in a frame shape with upper and bottom surfaces opened.

Claim 5 (Currently Amended): The holder according to claim [[1]]2, wherein said second component holding unit is configured to hold a receiver.

Claim 6 (Currently Amended): The holder according to claim 12, wherein said second component holding unit is configured to hold a display device.

Claim 7 (Currently Amended): The holder according to claim 12, wherein the holder is formed with resin by integral molding.

Claim 8 (Currently Amended): A portable telephone provided with the holder according to claim 12.
